WORK EXPERIENCE

Software Engineer 2 - Cisco Systems

Sept 2025 – Present

- Led software development of AIOps Agent, an intelligent observability platform enabling natural language queries about infrastructure health, providing real-time insights across Cisco's entire infrastructure stack
- Developed Change Predictive Analytics (CPA) platform using Machine Learning models on ServiceNow data to predict incident risks and forecast future alerts, improving change success rates by 25%
- Architected scalable microservices architecture using Python and FastAPI for full-stack development, supporting 10,000+ concurrent users with 99.9% uptime

Software Engineer - Cisco Systems

Sept 2024 – Aug 2025

- Led full-stack development to refactor and modularize large-scale incident management platform UI, implementing microservices architecture to streamline deployment and enable independent scaling
- Automated log management and enhanced access controls on centralized Graylog systems, deploying RBAC and Python/Ansible pipelines with DevOps practices to boost platform stability by 35%
- Implemented CI/CD pipelines using Jenkins and Docker for software development workflows, reducing deployment time from 2 hours to 15 minutes through performance optimization

Consulting Engineer - Cisco Systems

Aug 2023 – Aug 2024

- Automated VoIP device migrations using Python and Ansible playbooks with system architecture design integrated with Cisco DNA Center, eliminating 75% of manual steps and reducing delivery time by 40%
- Built Resource Allocation Manager (RAM) web application using full-stack development with React, FastAPI, and MongoDB for database design, aligning 100+ engineers with projects
- Designed and implemented RESTful APIs with proper database design serving 500+ daily requests with average response time under 200ms, incorporating unit testing and version control best practices

TECHNICAL SKILLS

Programming Languages: Python, Java, Kotlin, JavaScript, TypeScript

Frameworks: Spring, React, FastAPI, Node.js, Elasticsearch

AI & ML Frameworks: LangChain, LangSmith, A2A, MCP, OpenAI APIs

Databases: MySQL, MongoDB, Redis, Memgraph

Tools: Git, Docker, Nginx, Jenkins, Linux, OpenShift, Kafka, Figma, Postman

Certifications: Cisco Certified Network Associate (CCNA) and DevNet Associate

Methodologies: Agile Development, CI/CD Pipelines, Test-Driven Development (TDD)

PROJECTS

Fix and Review (FIRE) | *Python, Machine Learning, GitHub API, FastAPI*

2025

- Developed AI-powered GitHub agent using software development best practices in Python that automates code reviews and generates corrective proposals for pull requests
- Built ML-enabled review pipeline integrating static code analysis and runtime testing with model inference to detect code issues, suggest fixes, and generate review comments using RESTful APIs and version control, reducing manual review time by 60%

EDUCATION

Manipal University Jaipur

Bachelor of Technology in Computer Science Engineering

Aug 2019 – May 2023

CGPA: 9.7/10

Army Public School

Intermediate PCM (CBSE)

2019

Percentage: 96.4%

AWARDS & CERTIFICATIONS

TMA Pai Merit Scholarship (Academic)

2019 – 2023

Awarded for Academic Excellence at Manipal Academy of Higher Education for consistent high performance throughout the undergraduate program.
